

# MOVE YOUR FEET for CLIMATE ACTION!

1920s CHARLESTON! COMMUNITY ART!  
MARCH THROUGH THE STREETS! ! AERIAL PHOTO!  
INSPIRATIONAL SPEAKERS: world-renowned US  
climate scientist Dr James Hansen, with  
Wijnand Duyvendak and Meike Baretta

## MUSEUMPLEIN, 12pm

At 2pm we march en masse to the Lieverdje.

Show Jan Peter Balkenende that his citizens want green political change, not climate change.

This December at UN talks in Copenhagen, we need our leaders to commit to get back to 350ppm - the safe upper limit for carbon dioxide in the atmosphere - for a safe climate for today's youth and all future generations.

This is part of a series of NL climate events, culminating on Dec 12th in Utrecht with

# A petition to Jan Peter Balkenende, Prime Minister of the Netherlands

Your party and your government advance the principle of 'stewardship', but this principle is absent from your environmental policies, which are inadequate to preserve us from the curse of runaway warming.

## In the name of future generations, we appeal to you:

- > to block forthwith the construction of new coal-fired and nuclear power plants
- > to phase out existing coal and nuclear plants by 2020
- > to use your powers to designate locations on land and in the North Sea where wind parks may be rapidly constructed
- > to introduce a feed-in tariff for renewable electricity

## Moreover, we appeal to you to advocate the following measures during the climate negotiations in Copenhagen:

- > 40% reduction of carbon dioxide emissions by 2020 in the wealthy countries
- > an emissions peak not later than 2015
- > major financial and technological support for climate measures in developing countries
